

Boat Smart. Boat Safe.

Get Your Safe Boating Certification Today

Safety is #1 for you and your crew out on the water, and getting a head start, before your trip, is now easier than ever.

Get certified!

If you have not completed a safe boating course yet, You can either complete an in-person or on-line course from your state of residence (see links below), or you have the option to complete a classroom course from the [United States Coast Guard Auxiliary](#) or [United States Power Squadron](#).

Don't forget your crew!

Many captains also find it handy to have their whole crew review a safety course before their voyage. These courses are a great way to get everyone to start thinking about the trip *in advance* and you will find that they make for safer boating as well. Many of the online courses are free to review, easy to read, include interesting illustrations and videos, and even offer practice tests free of charge. **(most state courses offer the option to review the course materials for free.)**

Check out your state's website for certification details:

ARIZONA
